### Burn Free Bottles

Ref	Description	Quantity
BF1	Burn Free Bottle 118 ml	Single
BF2	Burn Free Bottle 48 ml	Single

BURNFREE Pain Relieving Gel is available in 48ml and 118 ml Bottles.

This gel is ideal for all minor burns. It is the same solution found in the burn dressings and fire/trauma blankets. When using BURNFREE Pain Relieving Gel, gently apply a liberal amount to the injured area without rubbing it into the wound. In order for the gel to be fully effective, it is necessary to apply a thick layer over the damaged area.

The dressings are more appropriate for larger and more serious burns. Since the open-cell foam dressings will maintain a thick covering of gel on the burn, they are a more efficient means of covering the area.

### Burn Free Sachets

BF3	Burn Free sachet	Single

### Burn Free Dressing

Ref	Description	Quantity
BF4	Burn Free Dressing 10cm x 10cm	Single
BF6	Burn Free Dressing 5cm x 15cm	Single
BF7	Burn Free Dressing 20cm x 20cm	Single
BF8	Burn Free Dressing 30cm x 30cm	Single
BF9	Burn Free Dressing 5cm x 5cm	Single

BURNFREE Sterile Burn Dressings are designed for first aid use on all types of burn injuries. The dressings are constructed of a special, soft, open-cell foam saturated with the BURNFREE solution. BURNFREE dressings have several beneficial physical characteristics such as:

Efficiently covers the burned area and yet elastic enough to accommodate possible swelling or the need to flex joints.

They are light, easily transportable sterile dressings.

A single application of this dressing is an effective first-aid measure on burns.

The dressings have a foam carrier and the foam's high absorption capabilities allow complete delivery of the gel to the burn site. BURNFREE dressings are non-adherent and the inert foam base will not shed threads, strands, fibers, etc., that might become embedded in the wound.

The moist BURNFREE solution facilitates easy removal for inspection and treatment of the injured area. The gel leaves no residue. It can easily be removed with water during normal debridement. BURNFREE gel is completely water soluble.

### Burn Free Trauma Blanket

Ref	Description	Quantity
BF10	Burn Free Trauma Blanket 91cm x 40cm	Single

#### Using BURNFREE® Fire/Trauma Blankets

BURNFREE Fire/Trauma Blankets provide physical protection from fires. When draped over the head and body, fire-resistant BURNFREE blankets are a protective shield for a rescuer or a person trapped by fire. The blankets also can be thrown over a burning area to extinguish flames and thereby create an escape route.

For immediate first aid treatment, the blankets can be wrapped around a person whose clothes are burning or who has sustained a burn injury. BURNFREE blankets will instantly extinguish fires, while at the same time, wetting and cooling the fuel, which is usually clothing.

This use of BURNFREE blankets reduces physiological and psychological trauma by providing immediate cooling, soothing, and moistening of the burn.

BURNFREE blankets can be used to reduce the pain and trauma of wounds from fires, flames, scalds, chemical, and electrical injuries. However, with chemical burns, the wound must be thoroughly irrigated, and preferably neutralized, before using the blanket. With electrical burns, the current must be turned off before using the blanket since the BURNFREE solution is water-based and conducts electricity. BURNFREE blankets can be used to extinguish fires, including pan or grease fires which occur in the kitchen. Before using for this purpose, turn off the electricity or gas. Place the blanket over the fire in a motion away from the body. After waiting for several minutes, the blanket can be removed.

The BURNFREE Hydrogel Survival Fire/Trauma Blanket is packed in a durable, flexible barrel bag with sealable double zip openers. The bag's flexibility makes it comfortable to carry. It also has a handle strap to hang the bag from the shoulder or around the body, freeing the hands.

### Burn Free Kit

Ref	Description	Quantity
BK1	Burn Kit - Contents Include: 1 x Burn Kit Box 1 x Paramedic Shears 1 x 120ml Bottle Of Burnfree Cooljel 118ml 2 x 10cm x 10cm Burnfree Dressings 2 x Pks (3) Burnfree Sachets 2 x 3" Conform Bandages 1 x 1" Zinc Oxide Tape 2 x Steropad Non-Adherent Dressings 1 x Pair Of Latex Gloves	Single
